

How do you add drag & drop indicators to the existing scale in your pane? (W%R, OBV, RSI...)

Both charting examples are "SPY" 2Y/Daily.

Wealth Lab:

On Balance Volume (OBV) Pane: Will not scale drag & drop indicators to the existing pane scale. Instead they are creating a new scale as an overlay.

Wealth Lab Example:

Example - From Active Trader Pro (ATP) where you can add an indicator from the existing pane indicators scale.

On Balance Volume Pane (OBV) shown with Simple Moving Averages are then scaled on the existing OBV scale.

This is the Pane that I'm trying to create in Wealth Lab:
